# Fast track serialisation compliance program

---

ANTAES

**Headquarter** - Geneva Business Center  
2, Avenue des Morgines CH - 1213 Petit-Lancy

*Partnership for excellence*

## REGULATORY CONTEXT —

Substandard, adulterated and counterfeit medicinal products penetration of the legitimate drug supply chain is a growing concern across the world. Numerous events are showing that this problem is not only affecting the developing world but also developed countries. Through the World Health Organization awareness and tracking effort and via the development of specific regulations (China, USA, EU and more...), a global effort is ongoing to introduce anti-counterfeiting mechanisms.

## PARTNERING WITH ANTAES —

Antaes has been an actor on this market since 2013, supporting the delivery by a major OTC market player of an integrated solution for China EDMC support.

From this, Antaes has built some **unique knowledge** across the different component parts of any serialization program.

- **Mastering of serialization and track and trace regulatory requirements on some of the key markets (US, EU, China, Korea, Russia, Gulf states)**
- **Ability to support any customer through their compliance with GS1 requirements**
- **Product portfolio reviews and investment strategy definition from end of packaging line equipment to centralized and decentralized product tracking systems**
- **Management of complex supply network integration**
- **Management of cybersecurity across the different ISA layers**
- **Deployment of serialization and track trace equipment (either EOM or Custom) at factory floor level**
- **Deployment of IT solution at L4/L5 solutions for integration with governmental systems (ERP or Cloud based)**

## HOW CAN WE HELP YOU? —

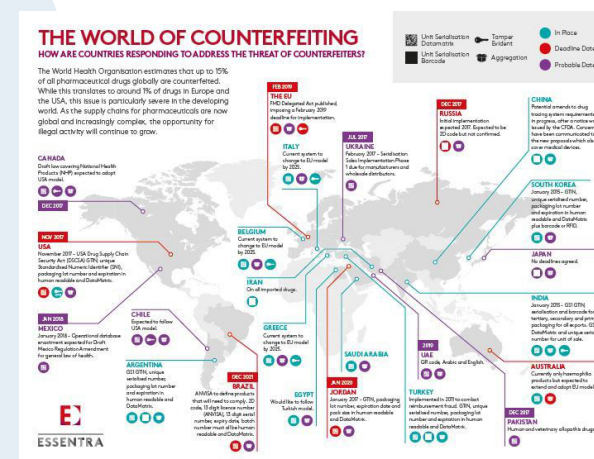

You are a pharmaceutical company or a CMO and you need to build your program or you need support, we are your partner of choice.

You are a third party pharmaceutical logistic provider, we can help you with integrate serialization requirements in your daily operation.

You are at the end of the supply chain (Hospital, healthcare providers etc...), we can help you to align your daily dispense practices.

## BUSINESS IMPACT — ILLUSTRATION —

Based on the improvement of individual sales unit traceability, those regulatory initiatives are a real challenge for most pharmaceutical companies as they are impacting the entire product lifecycle from early packaging to point of dispense authentication and patient interaction.

## ANTAES added value

- Antaes is an established serialization program partner for pharmaceutical companies across Switzerland
- Our experience allows to fast track your project by avoiding the traditional pitfalls faced by serialization programs
- We understand pharmaceutical regulations impact on business.
- Our ability to link regulatory requirements to operational process definition has been highly valued by our customers
- We are vendor neutral and can be trusted as an impartial integration partner.
